

Shimizu Gives Back to Nature

Think Green and Do Green. As part of Shimizu's CSR efforts and continued co-existence with society, it was the time again for us (Singapore office) to replenish Mother Nature. On 28 November 2014, 150 people including our staff and subcontractors gathered at One North Park, ready to do their part.

A total of 134 trees (each valued at \$200) were donated, amounting to a generous \$26,800. Clad with blue towels and work gloves, everyone went all out to hand-plant 50 young trees along the park. Out of 5 varieties, one is classified as an endangered species. A rainforest giant, *Kelumpang* is a tree native to Singapore and grows up to 40 metres tall.

This year marks the 4th running year of our participation in the NParks Plant-A-Tree program. With Singapore's 50th birthday approaching, let us contribute to this Golden Jubilee by driving even more green efforts, making our country a City in a Garden.
