

REFORESTATION ACTIVITIES

In September 2018, Thai Shimizu 14th reforestation activities was held. A total of 91 local employees of Thai Shimizu - a subsidiary of the international division, and family members participated in the tree planting activities at Chonburi province in order to tackle problems caused by deforestation, and support mitigation of climate. Through this project, we have planted 4,000 seedlings so far.

To understand that tree planting contribute to prevention of global warming by absorbing CO2.

CULTIVATE ENVIRONMENTAL AWARENESS TO SOCIETY

Education is the beginning of learning and implementation. At Thai Shimizu, every year we arrange the environmental activities to encourage environmental awareness. On March 22nd, 2018, We educated students the impact of our actions and activities on our environment, the ecosystems around us, and the 4Rs : Reduce, Reuse, Recycle and Reject at Watnong-puk-chee school, Saraburi province (near ABC project).
