

CATALER

**Client:**

Cataler North America Corporation

Facility Type:

Automotive Catalytic Converters Manufacturing Facility

Location:

Lincolnton, North Carolina

Size:

126,560 s.f.

Construction Date:

April 2001 - January 2002

Overview:

This 126,560 s.f. facility, build for the manufacturing of automotive catalytic converters, is representative of our largest clientele pool; the automotive industry. Over the years, Shimizu North America has acquired extensive knowledge of the special needs of these type of manufacturing facilities. Our objective is to provide these and other clients a facility that meets or exceeds their needs, and at the same time, help them to compete in the American automotive world.
