

TNK PRECISION

Client: TNK Precision U.S.A. Corporation
(Sanwa Needle Bearing)

Facility Type:
Automated Manufacturing Facility

Location:
Carrollton, Georgia

Size:
50,000 s.f.

Construction Date:
July 1987 - May 1988

Overview:

TNK secured Shimizu North America to integrate the construction and design of their automated manufacturing facility. This facility produces precision needle bearings which are used in the rollers of VCR cassettes. The building and its facilities fully support the efficient, automated production of the product.
