

650 MADISON

Client:

Hiro Real Estate Co.

Facility Type:

Office Building

Location:

New York, New York

Size:

536,000 s.f.

Construction Date:

June 1985 - February 1988

Overview:

To create this graceful 27-story building on Manhattan's prestigious Madison Avenue, Shimizu North America constructed a tower atop an existing 8-story building. The challenge was to complete the project without disturbing the operation of a bank housed within. Shimizu North America's ingenious engineers devised a system of lightweight trusses that adds a green-glassed silhouette to the skyline surrounding fabled Central Park.
