April 1992 - June 1993

Overview:

Shimizu North America utilized a complete turnkey project management approach to provide Daikin with a wide range of design and build services. Working with stringent fast track deadlines and high quality fast track standards, Shimizu North America constructed a prestigious and architecturally innovative administration and Employee Welfare Center, Warehouse Building, Quality control and Testing Lab and Maintenance Building, all of which service Daikin's process facility. Additionally, Shimizu North America's service included, but were not limited to, the design and installation of telephone systems, security monitoring systems, material handling, storage, testing and maintenance equipment, furniture, furnishings, landscaping models, media and display areas.
