

EPSON OR - PHASE I & II

**Client:**

Epson Portland, Inc.

Facility Type: Phase- I : Assembly building for computers and dot-head line printers, Phase- II : Assembly building for printers and computers

Location:

Portland, Oregon

Size:

80,000 s.f. (Phase - I) 80,000 s.f. (Phase - II)

Construction Date:

June 1985 - June 1986

Overview:

Epson wanted to double the size of its facility. Yet, production couldn't be halted during construction. Shimizu North America designed and built a connected building-then interfaced mechanical and electrical components between the two structures-all without interrupting production.
